

Contract Electronic Manufacturing Services

- Responsive Flexible CEM Service
- Diverse Industry Experience
- ISO9001:2008 Certified Quality System
- State-of-the-art Manufacturing Capabilities
- Cost Effective Electronics Manufacturing Solution

INDUSTRIES SERVED: Medical Equipment, Instrumentation
Networking, Communications
Security, Automotive
Consumer, Alternative energy
Computing, Data Storage
Industrial electronics

ESEMDA is a Contract Electronic Manufacturer, that focuses on high mix, low to medium volume, high reliability sector. We provide high quality electronic manufacturing services to customers requiring PCB assembly, sub-assembly, full turnkey and box build assembly. Our clients are large and small companies that deal with the areas of telecommunication, data processing, security, medical electronics equipment, laser and measurement technology. Located in the center of Europe. Highly-skilled workforce, flexible manufacturing and competitive pricing enable us to meet customer requirements for complex, high reliability products.
